CARINTHIA

At Carinthia, we have been pursuing a common goal every day for decades:
the permanent, innovative and performance-oriented further development of insulated clothing
and equipment - from professionals for professionals.

As a global market leader, service orientation, entrepreneurial spirit and innovative strength are the
focus of our activities.

The highest quality standards apply, because our products are 100% manufactured in Europe.
Professionalism and flexibility in the field of product development enable us to develop solutions that
provide more comfort and safety. Our products are tested by professionals and further developed together.

An important key to the company's success is the unique premium synthetic fiber insulation G-LOFT®.
Warm, light and breathable - even in extremely wet and cold weather. Unrivaled USP is the extraordinary
warmth-to-weight ratio of this high-tech fiber. The uniqueness of G-LOFT® acts as the basis of our
product portfolio.

**PREMIUM
INSULATION
TECHNOLOGY**

Made in Europe

Warm, light and breathable - even in extremely wet and cold weather: The revolutionary G-LOFT® insulation meets the highest standards. Due to the "MEMORY EFFECT" the fibers automatically return to their original and unique form, providing warmth, even after repeated washing and hard use. G-LOFT® guarantees optimal thermal insulation and heat regulation, both indoors and outdoors.

TECHNOLOGY

BI-COMPONENT FIBER

MEMORY EFFECT: The exceptionally fluffy and warming spiral form of the G-LOFT® insulation is achieved through the molecular structure of the bi-component-fiber.

SPECIAL FIBER BLEND

Microfibres and „Low-Melt-Fibres“ guarantee a permanent, fluffy G-LOFT® insulation with the minimum possible packsize.

NATURAL CLUSTERING

Similar to high-end down, G-LOFT® products form „Clusters“. Air is trapped in countless small pockets and ensures an optimal insulation.

BENEFITS

WARM & LIGHT

Maximum heat rating at a minimum weight: G-LOFT® is measurably perceptibly lighter and has measurably higher heat rating/thermal efficiency for the same weight.

TOP WET CONDITION PERFORMANCE

In contrast to down G-LOFT® fibers absorb no moisture. This guarantees a high thermal rating/thermal efficiency even in wet conditions.

HIGHLY COMPRESSIBLE

The miraculously small pack/weight ratio: When packed, air escapes from the G-LOFT® insulation, which later quickly unfolds again due to the MEMORY EFFECT.

HIGHLY BREATHABLE

The breathable G-LOFT® products guarantee a perfect temperature regulation outdoors and an optimal sleeping climate.

WWW.G-LOFT.EU

NEW HORIZONS

From now on our brand new „Combat Clothing“ line is available. Essential and functional combat clothing for soldiers in proven Carinthia quality.

Perfect fit, state-of-the-art materials and well thought-out details. Developed in close cooperation with special forces and already in practical use in Tier 1 units, the new Carinthia Combat Clothing offers highest wearing comfort and maximum comfort and maximum flexibility in the field.

All products of the new Combat Clothing Line carry the typical Carinthia DNA. To relieve typical neuralgic pressure points as well as to improve the moisture transport G-LOFT® NI is used in all articles and is functionally integrated. functionally integrated. G-LOFT® NI is a compressed polyester fleece that has been adapted to current operating conditions.

An additional gain in functionality and comfort is offered by the option of integrating our new elbow protection pads (developed and produced in cooperation with Komperdell). Thus, even operations close to the ground are no challenge for the Carinthia combat clothing.

- Mummy shape
- Differential cut
- 1-layer construction with loose outer shell
- 2-way side zipper with quick release fastener
- Zipper heat flap
- Zipper cover flap
- Anti-snap band
- Thermoflect
- Trapezoidal foot section
- Pack sack included

The Eagle is the right sleeping bag when minimum pack size and maximum temperature range are required. The G-LOFT® high-tech insulation fiber provides a comfort range of 10°C. Its light weight and small pack size makes this sleeping bag an excellent choice when assembling your survival gear.

- Differential cut
- Anti-snap band
- 2-way zipper
- Thermoflect
- 1-layer construction
- Integrated mosquito net

The Tropen is a very lightweight summer sleeping bag with extremely small pack size. He convinces with its vapor permeability, which is essential for hot and humid tropical nights is essential, as well as an integrated mosquito net.

- Differential cut
- Zipper cover flap
- Combinable
- Trapezoidal foot part
- Zipper heat strip
- Anti-snap band
- 2-way zipper
- Thermoflect
- 1-layer construction with loose outer shell
- Pack sack included

The Defence 1 Top is a lightweight sleeping bag with extremely small pack size and minimal weight. The Shellproof outer shell sits loosely over the inner construction and provides an extra layer of insulation to prevent cold bridges. This construction provides extra warmth on cold, damp nights. In warmer weather, the bottom section can be opened through the 2-way zipper for extra ventilation.

- Differential cut
- Thermal collar
- Trapezoidal foot part
- Zipper heat strip
- Anti-snap band
- 2-way zipper
- Thermoflect
- 2-layer construction

The Brenta with a cotton blend lining and a G-LOFT® thermal collar is the all-rounder with good thermal performance. Thanks to Thermoflect®, the heat emitted by the body is reflected and better heat retention is achieved. This sleeping bag is the right choice when insensitivity and versatility are important.

- 2-layer construction

The Defence 4 comes from the military sector and is one of the best-selling 3-season sleeping bags in its class. It is characterized by the centrally located zipper and an extremely robust and water-repellent outer material. The zipper cover flap protects against wind and moisture, and the integrated zipper heat flap additionally prevents heat loss.

Insulation: G-LOFT®, 100% polyester
Outer fabric: 100% polyamide | **Inner lining:** 100% polyamide

- Pack sack included

The Wilderness with G-LOFT® thermal collar offers limitless freedom of movement through (closable) arm openings. Optionally, the sleeve opening can be used as storage space (e.g. for lamps, batteries or cameras). Thanks to Thermoflect®, the heat emitted by the body is reflected and better heat storage is achieved.

- Trapezoidal foot section
- Pack sack included

The Defence 6 is a high-performance winter sleeping bag for arctic conditions with uncompromising thermal performance. It has a three-layer sandwich construction with a loose-fitting outer shell that guarantees optimal warmth. The generous zipper heat flap on the inside of the zipper prevents any heat loss. In addition, the zip cover flap on the outside ensures that wind and moisture stay away.

- Zipper heat flap
- Zipper cover strip
- Anti-snap band
- Thermoflect
- Trapezoidal foot section
- Pack sack included

This high performance winter sleeping bag is specially designed for military use. It has a generous heat flap on the inside of the zipper to prevent heat loss. The zipper cover flap keeps wind and moisture out. The Survival One features a differential cut, which means the insulation layer is more generously constructed. This ensures the greatest possible loft in all areas and in any sleeping position. Movement in the sleeping bag creates pressure points, but with the differential cut, only the innermost layer is compressed. By opening the zipper in the foot area, the foot end can be fixed in the back area. This ensures optimal freedom of movement and the sleeping bag can also be worn like a coat. The sleeves are stowed between the insulation layers.

Insulation: G-LOFT®, 100% polyester

- Mummy sleeping bag
- Differential cut
- Zipper heat strip
- Anti-snap band
- Thermoflect
- 2-way zipper
- Center zipper
- Trapezoidal foot section
- Pack sack + storage bag included

A top down sleeping bag with all the advantages that an expedition sleeping bag with a center zipper has to offer. The filling consists of High-Quality 90/10 goose down with a guaranteed fillpower of at least 600 CUIN. H-chamber construction, differential cut and the trapezoidal foot design are features of this high quality construction. Another important feature is the fully integrated pre-shaped hood with drawstrings, allowing the face opening to close to a very small breathing hole. The generous thermal panel on the inside of the zipper prevents any heat loss. The zip cover flap additionally keeps wind and moisture out.

Insulation: 90/10 goose down
Outer fabric: 100% polyamide | **Inner lining:** 100% polyamide
Outer dimensions (cm): 220/85/60 (M), 235/87/65 (L)
Weight (g): 1.700 (M), 1.800 (L) | **Sizes:** M, L
Pack size compressed (cm): 25x30 (M + L)

- 2-way center zipper with quick release closure
- Zipper heat flap
- Zipper cover strip
- Anti-snap band
- Trapezoidal foot section
- Pack sack + storage bag included

This uncompromising high quality sleeping bag is designed for extreme conditions. The proven H-chamber construction with elastic bars and the differential cut allows the down to reach its full loft and prevents cold bridges at the knees and elbows. The 2-way zipper on the front of the sleeping bag can be opened in the foot section for ventilation. Another important feature is the fully integrated pre-shaped hood, which can be closed by a pull cord to a very small breathing hole.

Opening the zipper on the bottom ensures quick entry and exit, while the foot area can be fixed and the sleeping bag acts as a coat. The arms can be stowed in the insulation.

Insulation: 90/10 goose down

BIVY BAGS

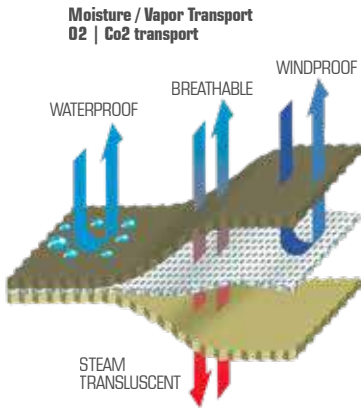

OBSERVER PLUS

The **Observer Plus** is a one-man bivouac that stands with two pole arches even without pegs and offers enough space inside for luggage. Thanks to GORE-TEX® ARID LITE AIR technology, a unique three-layer laminate, the Observer Plus is completely waterproof and extremely breathable. The viewing window with mosquito net allows views to the outside.

WHAT MAKES GORE-TEX® ARID LITE AIR SO SPECIAL?

We equip all our bivy bags and tents with the high-quality three-layer laminate from Gore. GORE-TEX® ARID LITE AIR is not only absolutely waterproof, windproof and vapor-permeable but also extremely breathable and - this is the special thing - gas-permeable. This means that you can completely close our bivy sacks and tents without having to leave a ventilation gap open. Because despite absolute weather protection, fresh air gets through the material.

3 Layer GORE-TEX® Laminate | **Outer fabric:** 100% PA 6.6
Functional layer: ePTFE based membrane | **Bottom fabric:** 100% PA
Length (cm): 240 | **Shoulder width (cm):** 104 | **Foot section (cm):** 75
Pack size (cm): 35x12 | **Weight (g):** 1.750

XP TWO PLUS

The XP II Plus is a bivy bag with a pole setup that keeps the face clear. Thanks to GORE-TEX® ARID LITE AIR technology, a unique three-layer laminate, it is completely waterproof and extremely breathable. Loops on the underside allow for the integration of a sleeping mat for additional comfort and protection against the cold.

3 Layer GORE-TEX® Laminate
Outer fabric: 100% PA | **Functional layer:** ePTFE based membrane | **Bottom fabric:** 100% PA
Dimensions (cm): 250/104/76
Pack size (cm): 35x10
Weight (g): 1.185

COMBAT

The COMBAT is a classic bivy bag with minimal pack size and weight. Its use is mainly in mountaineering, or as part of a survival pack. The PU-coated bottom ensures 100% waterproofness. The outer shell is made of a waterproof and windproof laminate, which is breathable at the same time.

3 Layer GORE-TEX® Laminate
Outer fabric: 100% PA | **Functional layer:** ePTFE based membrane | **Bottom fabric:** 100% PA
Dimensions (cm): 250/95/53
Pack size (cm): 32x8
Weight (g): 700

MICRO TENT PLUS

One-man bivouac tent designed for special forces. By means of two zippers running all around the middle section can be opened. The zippers are waterproof due to specially developed storm flaps. The integrated mosquito net can be closed separately. By five integrated loops on the back the insulation mat can be fixed.

3 Layer GORE-TEX® Laminat
Outer fabric: 100% PA | **Functional layer:** ePTFE based membrane | **Bottom fabric:** 100% PA
Dimensions (cm): 270/75/75
Pack size (cm): 35x12
Weight (g): 1.800

EXPEDITION COVER GORE

The Expedition Cover Gore is a classic bivy bag - absolutely waterproof and breathable. With the zip-in-zip system, you can zip your sleeping bag into the bivy bag. The entry and exit remains as pleasant and comfortable as with the sleeping bag without cover. The PU-coated bottom ensures 100% waterproofness.

3 Layer GORE-TEX® Laminat
Outer fabric: 100% PA | **Functional layer:** ePTFE based membrane | **Bottom fabric:** 100% PA
Length (cm): 230 | **Foot section (cm):** 90
Pack size (cm): 32x10
Weight (g): 600

SLEEPING BAG COVER

The bivy bag of the German Army. The practical center zipper is waterproof due to the special double storm flap. Generous mummy cut.

3 Lagen GORE-TEX® Laminat
Outer fabric: 100% PA | **Functional layer:** ePTFE based Membran | **Bottom fabric:** 100% PA
Dimensions (cm): 245/100/72
Pack size (cm): 35x8
Weight (g): 1.000
