INTRODUCTION

CARINTHIA stands for the Military/Tactical, Outdoor/Survival, and Hunting sectors.

We at **CARINTHIA** have consistently been pursuing a common goal for decades: the permanent, innovative, and performance-oriented development (and production) of cold protection clothing and equipment – by professionals for professionals. As a globally renowned brand, service orientation, entrepreneurial spirit and innovative strength are at the heart of our activities.

Our products are the result of intensive research and rigorous testing, precisely tailored to the individual needs and requirements of our customers. Our premium solutions are specially designed for the most extreme conditions. We maintain a consistent focus on robustness and continuous innovation to ensure outstanding performance – even in the harshest environments.

We remain true to our values: quality, innovation, and reliability are the cornerstones of our actions. We exceed our customers expectations and set new industry standards. That's why we are the optimal choice for anyone looking for first-class equipment.

INNOVATION AS ESSENTIAL PART OF OUR DNA – CARINTHIA INNOVATION LABS

We are more than a manufacturer - we are an **INNOVATION LAB** that promotes continuous development. We design almost everything in-house, underlining our focus on innovation and quality control. These values are the driving force behind every decision we make. They define who we are and guide us on our journey to be the preferred choice for those who demand the best and need to rely on their equipment.

SOCIAL RESPONSIBILITY

“Our dream is to live in a world where we only take what nature can replace. Join our dream.”

Augustin Mayer, founder & owner

Our products require significant resources – such as water and energy – for production, and transportation further contributes to the environmental footprint. That's why we deliberately avoid manufacturing in the Far East. Still, transport distances remain considerable.

We are aware that achieving truly sustainable production is a journey, and we are committed to approaching this goal day by day. We contribute through high-quality, functional, and timeless designs.

To extend product life and reduce the need for replacements, we rigorously test for durability. Each item comes with a two-year guarantee, during which we will repair or, if necessary, replace it.

OUR CONCEPT, MISSION & VISION

WHO WE ARE AND WHAT WE DO

CARINTHIA is a leader in the production of high-performance equipment specially designed for extreme situations. Our brand stands for the highest standards in quality, innovation and functionality. We set standards in the Military/Tactical, Outdoor/Survival, and Hunting sectors, targeting professionals who rely on our products.

Our solutions are shaped by in-depth research and developed to meet demanding requirements. Built for extreme use, they combine durability with cutting-edge design to deliver peak performance. Quality, innovation, and reliability remain at the heart of everything we do.

That's why we are the preferred choice for anyone looking for first-class durable equipment. At **CARINTHIA**, we are the drivers of innovation in the premium textile sector.

Our **INNOVATION LAB** combines decades of experience with pioneering technologies to develop ground-breaking products that stand the test of time.

VISION

The nature of our planet is the teacher that constantly shows us our limits. We are required to benefit from nature with respect and responsibility. We at **CARINTHIA** want to make our contribution with our optimized products.

Protection and comfort are the outstanding features of our products. With the G-LOFT® Premium Insulation Fiber, we have the best insulation technology currently available. We are expanding our quality and competence leadership in all markets. It is vital to us to grow in line with our sales in order to shape the markets. We will endeavor to continuously gain and expand social trust through our attitude.

MISSION

The Group's core competence is G-LOFT® insulation fiber, which has a wide range of properties. All of our business areas base their core strength on G-LOFT® technology. We want to demonstrate our expertise in all the relevant markets and act as a quality leader. We also seek to play a leading role in the respective markets in terms of sales volume. We develop all our products ourselves and manufacture them in our very own production facilities.

COMPANY HISTORY

More than seven decades ago, in Carinthia, the most southern part of Austria, a story began that would leave a lasting mark on the world of outdoor equipment. At its heart was Augustin Mayer, whose vision laid the groundwork for what we now know as the brand **CARINTHIA**.

In 1975, the company's founding father recognized the potential of synthetic fibers as insulation material for outdoor clothing and found that these fibers had better properties than down in many aspects. This realization became the starting point for the continuous innovative activity of Goldeck Textil, the umbrella brand of **CARINTHIA**.

At the end of the 1970s, the development of a special fleece system for the production of insulation materials with unique properties began. The result of this research and development process was **G-LOFT®** – an insulation technology that combines all the advantages of synthetic and natural materials: light, warm, and moisture resistant.

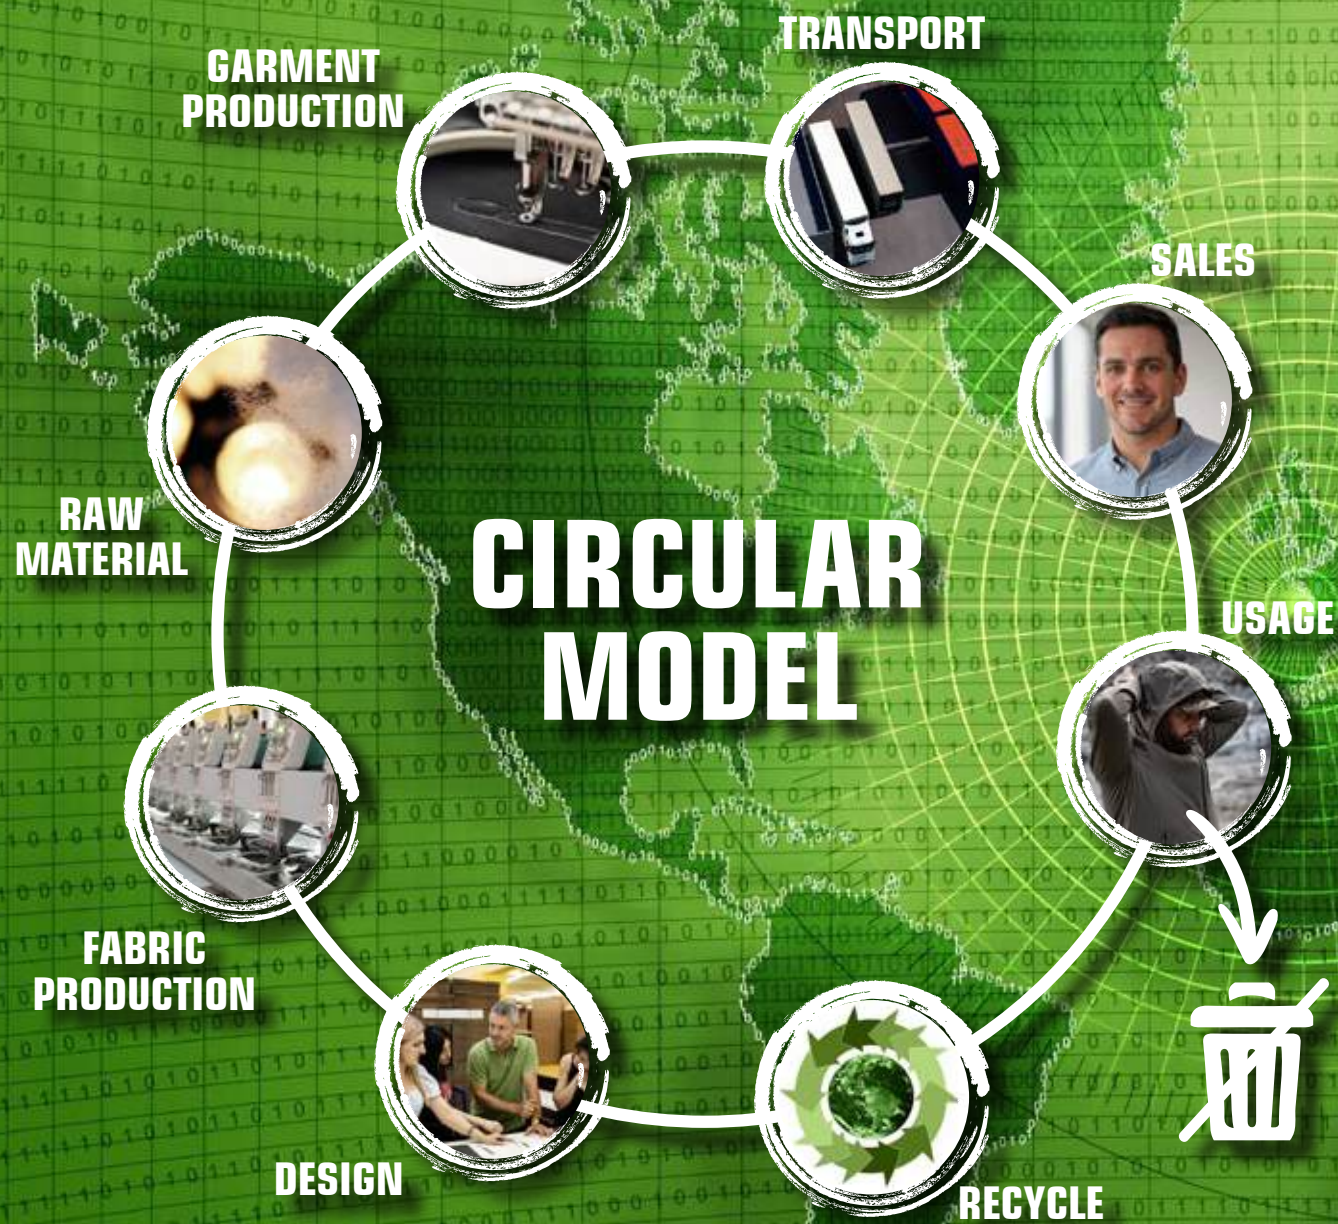

In 1994, another milestone in the company's history was achieved. Under the name CARINTHIA, premium products equipped with G-LOFT® technology made their way onto the international market. The products were well received by demanding customers in various climate zones and diverse areas of use.

Today, CARINTHIA is represented in 70 countries. The brand stands for the highest quality, technical innovation, and reliability under extreme conditions. Users' trust in CARINTHIA products is based on the company's continuous development and specific know-how.

The history of CARINTHIA illustrates how vision, perseverance, and a spirit of innovation can shape a successful company. From its roots in Carinthia to its rise as an internationally recognized brand, CARINTHIA has stayed true to its core philosophy: delivering optimal protective equipment across a wide range of applications through innovation and quality.

SUSTAINABILITY

ENVIRONMENT

SUSTAINABILITY - REALcycling - LONGEVITY

EUROPEAN SUPPLY CHAIN

We have a largely European value chain for our apparel and equipment, from procurement, production, and transportation to the customer. In the first phase, the focus lies on raw material suppliers of high quality and the use of materials that are made to last.

We closely supervise the various process steps along the value chain in order to have a greater influence on the quality of our products and to ensure better control mechanisms.

Suppliers are selected on the basis of quality, delivery reliability, and sustainability aspects.

CONCRETE MEASURES

Social, ecological & economic

- Production and raw material procurement in Europe.
- G-LOFT® production in Europe (Slovakia).
- Resale or recycling of the remaining raw material in G-LOFT® production.
- Heat recovery during nonwoven production.
- High quality materials and workmanship.
- Durability and longevity are two key characteristics of our **CARINTHIA** products. The longer our products are in use, the better for the environment.
- The most significant contribution to sustainability is a long-lasting product.
- Transportation with modern and environmentally friendly trucks.
- Our production relies heavily on renewable energy and upholds high social standards, reflected in our Amfori BSCI Level A.

CIRCULAR MODEL

- Fabric production: We source the finished fabrics from Europe.
- Raw materials: We use high quality raw materials to extend the life of our products.
- Garment production: Production in Europe and Armenia
- Transportation: We mainly use recycled materials for packaging and transportation.
- Sales: Our company stands for sustainability and innovation.
- Use: We provide instructions for use and washing instructions for every product. This contributes to a longer product life.
- Recycle: Recycling of rejects from production purchases and offcuts.

G-LOFT® STORY

In the 1970s, a revolution in insulation technology began, challenging the long-standing reign of down as the ultimate in warmth, lightness, and compressibility. Down had been the gold standard, revered for its thermal efficiency and compact nature. However, the mid-1970s introduced synthetic fibers as a compelling alternative, sparking a new era in material science.

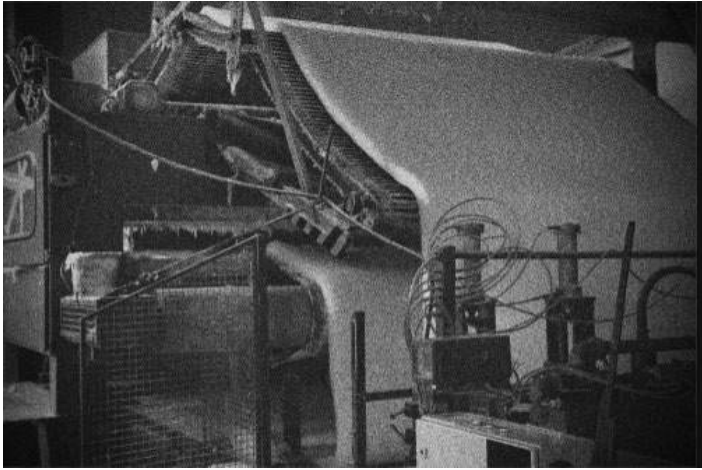

The quest to engineer a synthetic fiber that could rival down’s benefits became the pivotal innovation challenge. Synthetic fibers brought a critical advantage: their resilience against moisture, maintaining performance even when wet.

By 1981, a transformative moment occurred at the company’s headquarters in Seeboden: the launch of the first production facility dedicated to synthetic insulation fibers, heralding a new chapter of relentless development. Approximately a decade later, the vision expanded to establish a cutting-edge manufacturing facility in Slovakia. After five years of meticulous planning and designing, the outcome was a synthetic fiber production facility that stands today as one of the world’s most advanced.

The core mission was to replicate the unique cluster structure of down, which is essential for its exceptional insulating properties. Through innovative technology, this structure was meticulously mimicked, as validated by extensive testing.

The advent of G-LOFT® premium insulation fiber was nothing short of a breakthrough. It not only encapsulated outstanding functionality and adaptability but also affirmed the strategic choice to maintain production in Europe.

Now, G-LOFT® transcends beyond mere insulation; it embodies technological supremacy, unparalleled quality, and serves as the cornerstone for a company that thrives through continuous innovation and expertise.

CARINTHIA ISO MAPPING® TECHNOLOGY

The Innovation behind ISO Mapping®

Innovation at it's Core

Developing insulation clothing and equipment poses a unique challenge: combining precise thermal insulation with optimal freedom of movement and breathability. Through years of research and testing, the CARINTHIA INNOVATION LAB has introduced ISO Mapping® Technology, a ground-breaking solution that addresses the above mentioned demands.

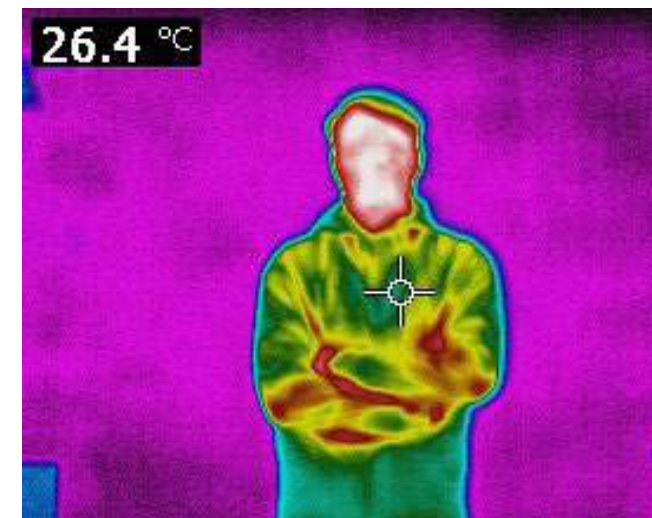

This innovative approach delivers:

- targeted thermal insulation tailored to specific body zones.
- enhanced mobility through strategically placed flexible materials.
- exceptional breathability, ensuring a balanced body climate in all conditions.

The result is an advanced clothing system that maximizes comfort and performance, even in the most demanding environments.

From Vision to Reality

ISO Mapping® Technology is the culmination of extensive research and development. By analyzing thermal radiation patterns across the body, CARINTHIA's team created a system that integrates advanced insulation materials for unmatched efficiency and comfort.

A Synergy of Advanced Materials

At the core of ISO Mapping® Technology are G-LOFT® Ci (Compact Insulation) and G-LOFT® STi (Stable Insulation). These materials provide:

- Precise body climate control, focusing warmth where it is needed most.
- Durability and reliability in extreme conditions, with an optimal warmth/weight ratio.
- Lightweight and compressible design without sacrificing functionality.

Redefining Outdoor Apparel

ISO Mapping® Technology goes beyond technical advancement – it revolutionizes outdoor apparel design. By zoning insulation to specific body regions, it ensures efficient heat use while maintaining full mobility. This technology is featured in a range of CARINTHIA products, including:

- **G-LOFT® TLG Jacket:** Ideal for transitional seasons, offering targeted warmth and flexibility.
- **MIG 4.0 Jacket:** Crafted for extreme weather, combining robust insulation with exceptional comfort.
- **ECIG 4.0 Jacket:** Designed for expeditions and polar missions, delivering unparalleled insulation performance.

Precise Protection for Professionals

The ISO Mapping® Technology reflects CARINTHIA's commitment to innovation and excellence. Whether for military operations, hunting expeditions, or extreme outdoor adventures, it ensures optimal comfort and performance in any scenario.

RANGE EXTENDER RE1

The Path to Innovation

A Continuous Development Process

Developing this revolutionary outer fabric involved a continuous process where our dedicated team invested in intensive research and development. This journey was marked by ongoing innovation, countless tests, and an unwavering pursuit of perfection.

The Centerpiece: Specially Developed Yarn

The foundation of our innovation lies in the selection of fibers which are engineered into a high-performance yarn. We have meticulously developed all subsequent process steps and machine settings throughout the production chain. This comprehensive approach is crucial for the exceptional performance of RE1 products.

RE1 - The Revolution in Outdoor Apparel CARINTHIA Series with RE1 technology

RE1 technology lies at the core of the new CARINTHIA Apparel Series, representing the latest masterpiece from the CARINTHIA INNOVATION LABS. This innovative material technology has been specifically designed for ambitious users facing extreme conditions and high-intensity activities. It aims to achieve an unprecedented balance of functionality, comfort, and durability.

The Technical Revolution behind RANGE EXTENDER1

There is a clear challenge in the high-performance outdoor sector: How do you combine extreme robustness, maximum flexibility, and unmatched comfort without compromising on functionality and durability? The **CARINTHIA INNOVATION LAB** has spent several years developing the RE1 – Range Extender.

This revolutionary high-tech performance fabric combines:

- Extreme robustness for the toughest conditions.
- Maximum flexibility thanks to RE1 4-way stretch.
- Incomparable comfort thanks to high air permeability.
- Low noise levels.
- Exceptional durability, even with intensive washing cycles up to 95°C.

The unique outer fabric is characterized by exceptional stretch properties and the innovative Formfit technology. The material retains its shape and elasticity during intensive activities and after high washing temperatures of up to 95°C. This enables unprecedented freedom of movement and high wearing comfort in an environment that demands absolute durability.

Built to perform. Designed to protect. Engineered for comfort.

Redefining Comfort & Durability

In the high-performance outdoor sector, there is a clear challenge: How do you combine extreme robustness, maximum flexibility, and unparalleled comfort without compromising on functionality and durability? The Goldeck Pants from CARINTHIA embody exactly these qualities. Developed over years of research, these revolutionary outdoor trousers are made for those who refuse to compromise – especially in the toughest conditions. Whether in rocky mountains, dense forests or extreme weather conditions – the Goldeck Pants offer unrestricted freedom of movement and at the same time maximum protection and comfort.

The Goldeck Pants combine advanced materials with practical design, offering the perfect balance of functionality, comfort, and durability for demanding outdoor adventures.

- **Enhanced comfort & protection:** G-LOFT® insulation integrated into the waistband for flexibility and thermal regulation.
- **Optimized ventilation:** Strategically placed ventilation slits ensure superior air circulation during intense activities.
- **Practical storage:** Thoughtfully designed pockets provide ample space for essential gear.
- **Adaptive design:** Integrated belt in corresponding camo design for improved mobility and versatility.
- **Customizable fit:** Individually adjustable leg cuffs for personalized comfort and compatibility with various footwear.

Redefining Comfort & Durability

The Goldeck trousers series from CARINTHIA, including both the Goldeck Pants and Goldeck Shorts, represents a breakthrough in high-performance outdoor wear. These garments are the result of years of research, designed to meet the challenge of combining extreme robustness, maximum flexibility, and unparalleled comfort without compromising on functionality or durability.

The Goldeck Shorts, as a member of this innovative series, inherit the same revolutionary features as their full-length counterparts. They offer unrestricted freedom of movement while providing maximum protection and comfort, making them ideal for a variety of outdoor activities in challenging conditions.

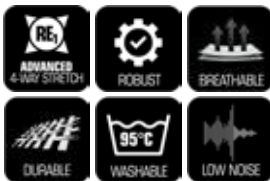

- **Enhanced comfort & protection:** G-LOFT® insulation integrated into the waistband for flexibility and thermal regulation.
- **Practical storage:** Thoughtfully designed pockets provide ample space for essential gear.
- **Adaptive design:** Integrated belt in corresponding camo design for improved mobility and versatility.

Redefining Outdoor Comfort & Robustness

High-performance outdoor pants crafted for tactical professionals and dedicated hunters. These pants combine advanced technology with practical design, ready to tackle the most demanding environments. From dense forests to rocky terrain and unpredictable weather, the Goldeck Hunt Pants deliver exceptional versatility, comfort, and functionality. Built with a focus on durability, smart storage solutions, and adjustable fit, these pants meet the high expectations of outdoor enthusiasts who call for best performance equipment. Experience the ideal blend of toughness and comfort as the Goldeck Hunt Pants become your trusted companion on your next outdoor adventure.

- **4-way stretch:** Unparalleled flexibility and maximum freedom of movement
- **Extreme durability:** Engineered to withstand the harshest conditions.
- **Superior breathability:** Keeps you dry and comfortable during intense activities.
- **Noise reduction:** Ideal for activities requiring silent movement.
- **High-temperature washable:** Retains shape and elasticity even after washing at up to 95°C.
- **G-LOFT® waistband:** Provides comfort, flexibility, and protection.
- **Tactical storage system:** 2 leg pockets with side access and additional mesh-separated organizer compartments, 2 standard trouser pockets, 1 tactical rear pocket, 1 blade pouch for tactical tools.
- **Enhanced hip comfort:** Elastic insert for superior wearing comfort.
- **Adjustable fit:** Individually adaptable Velcro waistband.
- **Customizable leg openings:** Adjustable leg cuffs for personalized fit.
- **Reinforced pockets:** Cordura-strengthened trouser pockets for increased durability.

Advanced Waterproof Technology for Silent Outdoor Performance

LOFTSHELL® Hydro Pants are designed for demanding outdoor adventures, combining thoughtful composition with the innovative LOFTSHELL® technology to deliver reliable protection and exceptional comfort. The G-LOFT® Climate Lining ensures efficient moisture management by absorbing humidity and releasing it through a breathable membrane, keeping you dry and comfortable in any feasible situation.

The durable outer material, featuring sealed seams, makes the pants completely waterproof and wind-proof, while their silent design is ideal for activities requiring stealthy movement.

The LOFTSHELL® Hydro Pants are the perfect complement to the Hydro Jacket and an indispensable companion for everyone who relies on their gear in harsh conditions. Experience maximum functionality, comfort, and protection – engineered for the toughest challenges.

- **Advanced outdoor pants:** Engineered for comfort and functionality.
- **Versatile storage:** 4 practical pockets, including 2 spacious thigh pockets for essential gear.
- **Optimal ventilation:** Side openings extend to the waistband, ensuring maximum airflow during intense activities.
- **Customizable support:** Removable and adjustable suspenders for a personalized and secure fit.
- **Secure footwear integration:** Integrated boot hooks to maintain a reliable connection with your boots.

LOFTSHELL®

THE LOFTSHELL® STORY

In the outdoor and operational sector, there is no margin for compromises. Our customers – whether in the military, outdoor survival, or professional use – demand clothing that is versatile, functional, and reliable. While softshell products were once considered the gold standard, they quickly showed their limitations in real-world applications. At CARINTHIA, we recognized the need for a better solution, one that could meet the relentless expectations of our users.

In developing **LOFTSHELL®** we had a clear vision: we wanted to create a layer that combines the advantages of a classic shell with the warmth and flexibility of an insulating layer. The development process was characterized by intensive research, field tests, and a close exchange with our target group. The use of state-of-the-art materials and our expertise in insulation and weather protection technologies resulted in a product that is both lightweight and robust.

LOFTSHELL® combines an elastic outer shell with an innovative comfort layer to create a unique wearing experience. The ultra-light comfort layer efficiently transports moisture away from the skin to the outside. This ensures comfort across a broad temperature range, with materials that feel soft and pleasant on the skin.

KEY FEATURES LOFTSHELL®:

- **SUPERIOR MOISTURE WICKING:**
LOFTSHELL® provides optimum moisture transportation to the outside and keeps the wearer dry, comfortable, and efficient inside during various outdoor activities.
- **PRECISE TEMPERATURE REGULATION:**
LOFTSHELL® offers a generous comfort zone. At high temperatures or during intensive activity, LOFTSHELL® dissipates excess heat, while at lower temperatures it prevents energy loss.
- **LOW NOISE FABRICS:**
LOFTSHELL® technology uses comfortably soft and low-noise outer fabrics. Nothing distracts you from your adventures.
- **REDEFINED WEARING COMFORT:**
The innovative material composition offers a soft and pleasant feeling on the skin. Wearing comfort is significantly improved.

LOFTSHELL® stands for groundbreaking moisture management and unbeatable comfort – **COMFORT REDEFINED**. With LOFTSHELL® we are setting a new standard in performance. Our product developments in the CARINTHIA INNOVATION LAB represent not only the progressiveness of CARINTHIA but also our commitment to always finding the best solutions for our customers.

Redefining Outdoor Comfort

Experience the revolution in outdoor clothing with the new LOFTSHELL® Climate Jacket by CARINTHIA. This functional and extremely comfortable jacket sets new standards in comfort and functionality thanks to the innovative LOFTSHELL® technology. The LOFTSHELL® Climate Jacket combines a highly flexible outer fabric with a superb inner material made of merino wool knit. The innovative centerpiece of this jacket is the ultra-lightweight G-LOFT® Climate Lining, which ensures optimum moisture transport. This keeps the skin pleasantly dry and warm even during intense activities. The jacket's elastic outer material matches your movements, ensuring optimal comfort and unrestricted mobility. The LOFTSHELL® Climate Jacket is water and wind repellent without using a membrane, which makes it particularly breathable. It is also low-noise, ideal for outdoor activities where soundless movements are crucial.

- **Revolutionary Loftshell® Technology:** Highly flexible outer fabric adapts to your movements. Merino wool knit inner layer for natural comfort and temperature regulation.
- **Advanced climate control:** Ultra-lightweight G-LOFT® Climate Lining optimizes moisture transport. Keeps skin dry and warm during intense activities.
- **Weather-ready design:** Water and wind repellent without a membrane for enhanced breathability. Fixed hood for additional protection against the elements.
- **Stealth performance:** Low-noise fabric ideal for activities requiring soundless movement.
- **Practical functionality:** Two reinforced inner mesh pockets for secure storage.
- **Versatile application:** Perfect for a wide range of outdoor pursuits.

Ultimate Freedom in Outdoor Performance

For those who want even more freedom of movement and perfect ventilation, the LOFTSHELL® Climate Vest is the right choice. This brand-new design features our new and innovative LOFTSHELL® technology and the ultra-light G-LOFT® Climate Lining ensures optimum moisture transport and a very comfortable fit. Like the Climate jacket, the LOFTSHELL® Climate Vest is water and wind repellent. No membrane is used, which makes it particularly breathable. The low-noise material composition of merino wool knit and highly flexible outer fabric makes this vest the perfect companion on upcoming adventures.

- **Advanced LOFTSHELL® Technology:** Highly flexible for unrestricted and silent movement. Merino wool knit inner layer for natural comfort and temperature regulation.
- **Optimal climate control:** Ultra-light G-LOFT® Climate Lining ensures superior moisture management. Exceptional breathability without the use of a membrane.
- **Weather-ready design:** Water and wind repellent for protection against the elements.
- **Practical functionality:** Reinforced inner pockets for secure storage of essentials.
- **Versatile performance:** Perfect for layering or as a stand-alone piece in milder conditions.

Advanced Waterproof Technology for Silent Outdoor Performance

The LOFTSHELL® Hydro is an innovative, low-noise outdoor jacket that impresses with its outstanding technical properties. The G-LOFT® Climate Lining absorbs moisture and efficiently wicks it away through a membrane, leaving the skin feeling pleasantly dry. The inside of the jacket is equipped with the G-LOFT® Climate Lining and an extremely thin ultra inner fabric. The special construction includes an outer fabric with an integrated membrane and fully taped seams that guarantee absolute waterproofness and windproofness. The jacket has three outer pockets and two inner mesh pockets providing additional storage space. The G-LOFT® Climate Lining ensures exceptional comfort and outstanding moisture management. The jacket is also low-noise, making it ideal for activities where quiet movement is crucial. Experience the perfect combination of technical innovation and maximum comfort with the CARINTIHA LOFTSHELL® Hydro Jacket.

- **Innovative moisture management:** G-LOFT® Climate Lining efficiently absorbs and wicks away moisture. Ultra-thin inner fabric for next-to-skin comfort.
- **Superior weather protection:** 2-layer laminate construction with integrated membrane. Fully taped seams ensure absolute waterproofing and windproofing.
- **Stealth design:** Low-noise fabric ideal for activities requiring soundlessness.
- **Practical storage:** 3 outer pockets and 2 reinforced inner mesh pockets.
- **Enhanced comfort:** Fixed hood for additional weather protection. Waterproof zippers for added defense against the elements.

Innovative technology for targeted protection against the cold and an optimum warmth/weight ratio.

The G-LOFT® TLG series uses the innovative CARINTHIA ISO Mapping® technology. This concept combines different G-LOFT® variations offering effective protection against the cold, and providing targeted warmth where it is needed. The result is an advantageous warmth/weight ratio that is suitable for both cold temperatures and the transitional period.

An important feature of this series is the integration of Techno Stretch in the torso area, which allows good freedom of movement. Features include a one-way zipper, a convenient inner chest pocket, and two spacious outer pockets for personal essentials.

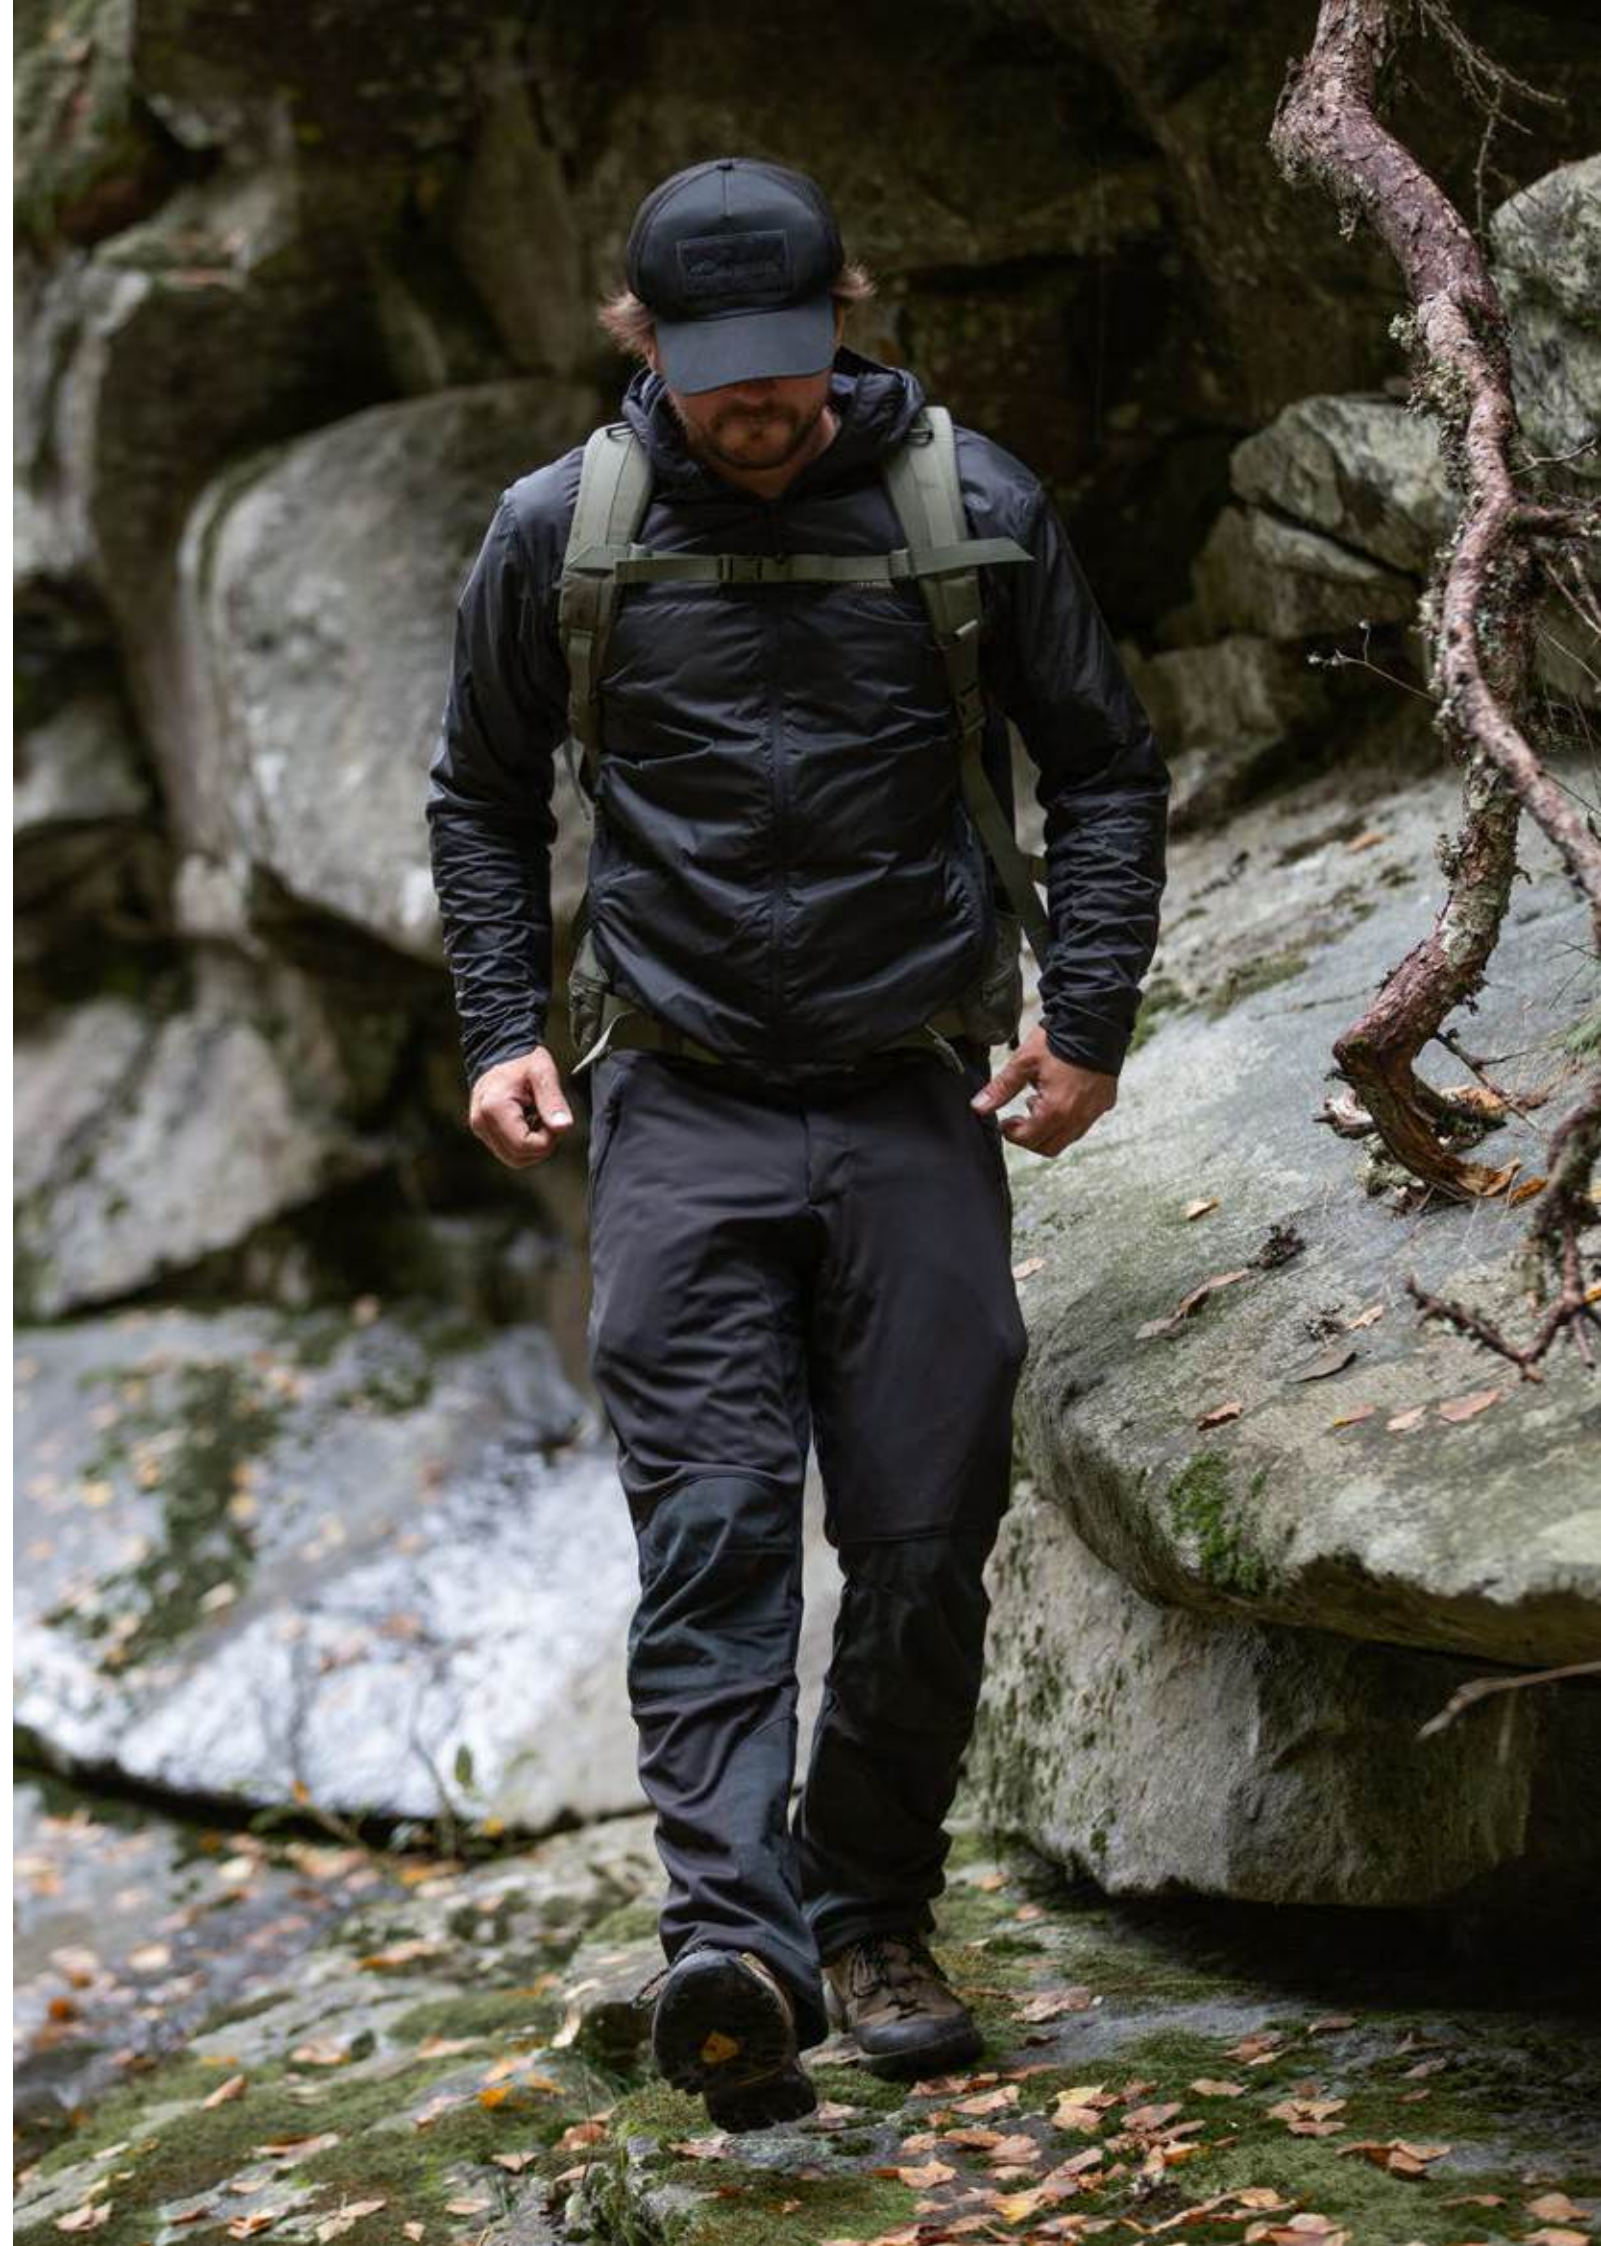

The hood with its reinforced peak can be adjusted using elasticated drawstrings. An internal, one-hand adjustable elasticated drawstring at the hem ensures a good fit and additional protection against the cold.

- **Full-length front zipper:** Easy to use and practical for quick donning and doffing.
- **Secure inner chest pocket (Napoleon pocket):** Provides protected storage space for important items such as a smartphone or wallet.
- **2 spacious outer side pockets:** Ideal for quick access to frequently used utensils or for keeping hands warm.
- **Functional hood with reinforced peak:** Provides reliable protection against wind and weather, with improved visibility thanks to the sturdy peak.
- **Adjustable hood with elastic drawstrings:** Allows individual adjustment for optimum fit and protection during various activities.
- **Practical hem drawcord:** Internal, one-hand adjustable for improved protection against the cold, and perfect fit.
- **Integrated Techno Stretch material:** Ensures excellent freedom of movement and comfort during all outdoor activities.

Where G-LOFT® innovation meets Techno Stretch, maximum freedom of movement and a perfect body climate.

The CARINTHIA ISO Mapping® technology revolutionizes the TLG series through the synergetic fusion of different G-LOFT® insulations. This innovation results in an optimized warmth-to-weight ratio, ideal for variable weather conditions. The integration of Techno Stretch in the torso and underarm areas ensures maximum freedom of movement. Strategically placed mesh inserts under the arms enhance thermoregulation and ventilation, ensuring an optimal body climate.

- **Precise closure solution:** One-way zipper for reliable and uncomplicated protection.
- **Tactical quick access:** Integrated Napoleon pocket for secure and easily accessible storage of important items.
- **Generous storage space:** 2 spacious side pockets offer space for equipment and keep hands warm at the same time.
- **Optimum weather protection:** Hood with reinforced peak for improved protection against wind and precipitation.
- **Individual fit:** Hood with elastic cords for perfect, situation-specific adjustment.
- **Ergonomic adjustment:** Internal, one-handed elastic drawcord at the hem for optimum fit and wind protection.
- **Maximum freedom of movement:** Techno Stretch material for unrestricted flexibility during all activities.
- **Intelligent climate management:** Strategically placed mesh inserts for effective ventilation and optimum temperature regulation.

**Military precision meets everyday robustness:
Cordura technology for maximum protection.
Compact, lightweight, and functional – the ultimate
backup solution for any challenge.**

Designed according to military specifications. The highly developed Cordura outer material offers exceptional robustness and wind resistance. The innovative cut of this lightweight jacket is slightly extended at the back to optimally protect sensitive areas of the body from the elements. Instead of a hood, it has a short stand-up collar with integrated chin guard. The jacket can be compressed to a minimum pack size, ideal as a backup solution in a rucksack. Equipped with two zipped side pockets, an inside pocket and a patch pocket on the left upper arm.

- **Optimized pocket system:** Two spacious side pockets with robust zippers.
- One secure zippered inner pocket for valuables.
- Functional sleeve pocket for quick access.
- **Ergonomic collar protection:** Short stand-up collar with integrated chin guard for optimum comfort and wind protection.
- **Innovative packing system:** Left side pocket designed as an integrated pack sack – allows the jacket to be stowed compactly for maximum portability.

**Functional overtrousers with waist-high zipper
for easy donning and doffing. Windproof material,
adjustable fit, and integrated pack sack for
versatile outdoor activities.**

These practical overtrousers combine comfort and functionality. A waistband-high zipper allows for quick on/off – ideal for changing weather or activity levels. An integrated belt and optional suspenders provide flexibility, while the windproof, abrasion-resistant outer fabric ensures reliable protection. The left leg doubles as a pack sack, making them perfect for travel and expeditions.

- **Practical waistband-high zipper:** Enables the trousers to be put on and taken off in a flash, ideal for spontaneous changes in weather or in your outdoor activities.
- **Ergonomically pre-shaped knee area:** Offers optimum freedom of movement and increased comfort during various outdoor activities and demanding movement sequences.
- **Flexible, adjustable waistband:** Adapts individually to different body shapes and ensures a secure, non-slip fit with every movement.
- **Innovative integrated pack sack:** The left trouser leg can be cleverly converted into a compact storage sack – perfect for space-saving stowage when traveling or on expeditions.
- **Versatile carrying options:** Equipped with an integrated belt and the option to attach suspenders for maximum adaptability to personal preferences.
- **Weatherproof design:** The abrasion-resistant and windproof outer material provides reliable protection against adverse weather conditions without compromising on breathability
- **Adjustable leg width:** Thanks to the Velcro and press stud fastener, the width of the leg cuffs can be individually adjusted.

Advanced thermal regulation meets everyday versatility. Thermal management for uncompromising performance in everyday use.

The CARINTHIA ESG (Essential Shell Garment) represents the quintessence of advanced insulation technology in an everyday design. This jacket integrates CARINTHIA's advanced G-LOFT® insulation into an ergonomic, versatile design to deliver optimal thermal efficiency and comfort across a wide range of use scenarios.

The CARINTHIA ESG combines state-of-the-art insulation technology with a user-oriented design to create a precisely engineered thermal management system optimized for daily use in a variety of activities and environmental conditions.

This ESG Jacket is not just an insulating layer, but an essential element of your daily kit. It offers reliable protection against the cold when it counts, paired with timeless aesthetics.

- **Multifunctional side pockets:** 2 spacious pockets with robust zippers (left pocket innovatively designed as an integrated pack sack).
- **Secure inner pocket:** 1 zippered inner pocket for valuable items.
- **Thermo-regulating cuffs:** Integrated pulse warmers for optimum heat regulation.
- **Adjustable hem:** For a customized fit and improved weather protection.
- **Ergonomic chin guard:** Reinforced area for increased comfort and wind protection.

Versatile reversible jacket for outdoor adventures: the Turn2Dry with G-LOFT® insulation. Lightweight, warm, and quick-drying thanks to the innovative Turn2Dry system for maximum comfort in any weather.

This innovative reversible jacket combines functionality with effective thermal insulation. Its lightweight design and G-LOFT® insulation provide reliable warmth at a low weight, which supports freedom of movement during various outdoor activities. The practical Turn2Dry system with side zippers allows quick opening for accelerated drying, ideal for changing weather conditions. The stand-up collar protects against wind and cold, while the integrated, G-LOFT®-lined hood provides additional comfort when needed. Thanks to its compact pack size, the jacket is a versatile companion for outdoor enthusiasts who value flexibility and performance in different environments. The Turn2Dry jacket represents the perfect combination of essential features in a versatile design, created for demanding outdoor adventures.

- **Intelligent storage system:** 2 strategically placed zippered side pockets in the black version for secure and quick access.
- **Advanced Turn2Dry system:** Long, two-way side zippers for flexible ventilation and accelerated drying.
- **Optimized hood:** Integrated, thermally insulated hood for reliable protection in changing weather conditions.
- **Ergonomic collar design:** Compact stand-up collar for effective wind protection and improved comfort.

OLIVE

Lightweight warming vest with optimized fit and G-LOFT® insulation. Breathable, compactly packable, and versatile for outdoor and everyday use.

The G-LOFT® Ultra Vest 2.0 is the ideal choice for anyone looking for a lightweight and warm vest. This revised version convinces with its optimized fit and improved design without sacrificing the proven G-LOFT® insulation.

The vest is characterized by its excellent breathability and can be stowed away easily thanks to its small pack size. It offers effective insulation and is perfect as a backup or stand-alone layer. The quilted collar with G-LOFT® filling provides additional comfort and warmth in the neck area. Stretch inserts in the back ensure optimum freedom of movement, while the body-hugging cut offers a good fit.

A special highlight is the integrated pack sack solution in the left outer pocket, which makes it easy to stow the vest. The G-LOFT® Ultra Vest 2.0 thus combines lightness, warmth, and functionality in a modern design – ideal for versatile outdoor activities and everyday use.

- **Comfortable quilted collar with G-LOFT® filling:** Provides additional warmth and protection in the sensitive neck area.
- **Innovative stretch inserts in the back:** Ensure optimum freedom of movement during all activities.
- **Ergonomic body-hugging cut:** Ensures an optimum fit without restricting at all.
- **2 spacious pockets on the outside:** Quick and easy access to important items such as your smartphone, keys, or wallet.
- **Functional Napoleon pocket** on the inside left.
- **Clever integrated pack sack solution in the left outer pocket:** Allows the vest to be stowed compactly, perfect as a space-saving storage solution in a rucksack.
- **Versatile application options:** Suitable as a stand-alone layer or as a warming mid-layer, adaptable to different activities and weather conditions.

Lightweight & efficient: The LIG 4.0 - your compact protective shield against the cold. Tried and tested by professionals, perfected for adventurers – maximum performance with minimum weight.

The LIG 4.0 is an uncomplicated cold protection jacket that impresses with its lightness and functionality. This continuously developed jacket, which is also very popular with the German Armed Forces (5-Farb Flecktarn version), is characterized by technical improvements. The integration of a stowable hood and a rear storage system optimizes usability. Thanks to its minimal weight and compact pack size, the LIG 4.0 has established itself as an indispensable companion for demanding missions, guaranteeing maximum protection and performance.

- **Weatherproof outer shell:** High-performance, water repellent outer material for reliable protection against the elements.
- **Adaptive hood:** Adjustable collar with cleverly integrated hood for flexible adaptation to changing weather conditions.
- **Comfort zone at the neck:** Soft inner collar made of warming thermal fleece for a comfortable fit and additional insulation.
- **Warm storage:** 2 spacious, covered outer pockets with thermal fleece lining for warm hands and secure storage.
- **Quick-access security:** Practical Napoleon inner pocket for important items within easy reach.
- **Integrated wrist warmer** for added comfort in cold environments.
- **Tailored fit:** One-handed drawstring waist, cleverly hidden in the pockets, for quick and easy adjustment.
- **Hidden extra function:** Storage pocket integrated in the back for extra storage space without compromising on design.

Lightweight outdoor trousers: weatherproof, compact, and versatile. High comfort, and sophisticated functionality for your adventures.

The LIG 4.0 Trousers set new standards in terms of versatility and efficiency for outdoor enthusiasts. With their low weight and compact pack size, they are the ideal companion for any adventure. The water repellent outer material offers reliable protection against the elements without restricting freedom of movement.

The minimalist cut combines comfort and functionality at the highest level. An elasticated waistband with an internal drawstring and button fastening ensures a perfect fit, while the two-way zipper with wind protection offers additional comfort. The pre-shaped knees ensure optimum freedom of movement during all kinds of activities.

- **Integrated pack sack** on the inside of the left leg for space-saving storage and easy transportation.
- **Robust, water repellent outer material** for reliable protection against the elements.
- **Comfortable elasticated waistband** with internal drawstring for individual width adjustment and secure button fastening for optimum fit.
- **Practical two-way zipper** with integrated wind protection for flexible ventilation and protection against cold bridges.
- **Ergonomically pre-shaped knee section** for improved freedom of movement and an optimized fit for various activities.
- **Versatile adjustable leg cuffs** with Velcro fastener and additional press studs, can be used flexibly with different types of footwear.
- **Provision for holster suspenders** for additional carrying options and stability when required.

The premium insulation jacket offers extreme durability and optimum protection in temperatures down to -20°C. The hydrophobic outer material and the triple-adjustable hood, which can be integrated into the collar, guarantee independence from the weather. CARINTHIA stands for uncompromising quality and reliability in outdoor performance clothing.

- **Tactical discretion:** Covered components for quiet operations, increased durability & reduced visibility.
- **Adaptive hood:** Innovative hood adjustable in 3 directions, stowable in the collar for maximum flexibility.
- **Intelligent climate management:** Sophisticated ventilation system with side access openings for optimum temperature regulation.
- **Versatile closure solution:** Two-way concealed front zipper with integrated wind protection and comfortable chin flap for reliable weather protection.
- **2 spacious outer pockets** with zipper, lined with thermal fleece for warm hands and secure storage.
- **Quick-access inner pocket:** Practical Napoleon pocket for important items within easy reach.
- **Tactical arm pockets:** 3 functional pockets on the arm for quick access to essential equipment.
- **Customization:** 3 Velcro fasteners for personal badges or additional equipment.
- **Perfect fit:** Adjustable elastic drawstring at the hem for windproof closure and optimal fit.
- **Compact mobility:** Pack sack included for space-saving transportation and easy storage.

Tactical cold protection trousers for extreme conditions and demanding outdoor activities.

Maximum protection, optimum functionality, and comfort in icy temperatures.

These versatile cold weather trousers are designed for tactical operations and demanding outdoor activities. With a sophisticated design, they offer optimum protection in cold environments for professional users and outdoor enthusiasts alike.

The raised waistband at the back provides reliable protection against cold and drafts. Velcro-adjustable suspenders ensure a perfect fit for long missions or extreme outdoor challenges.

Reinforced knee and hem areas increase durability during intensive activities. A back pocket with a concealed zipper and zipper garage offers secure storage space.

The two-way side zipper with wind protection allows easy donning and doffing as well as flexible ventilation. The full coverage of all components prevents thermal bridges and ensures maximum protection against the cold.

These trousers are ideal for anyone who needs maximum performance in cold conditions – from emergency services to outdoor professionals. They combine tactical functionality with everyday practicality and offer superior protection in extreme conditions.

Whether for tactical operations, alpine expeditions, or winter camping – these cold protection trousers are the steady companion for all outdoor activities reliant on performance and comfort in icy temperatures.

- **Concealed component design:** Sophisticated construction with covered elements.
- **Ergonomic cold protection:** Raised back waistband guards against cold and drafts during intense activities.
- **Strategic reinforcement:** Durable hem and knee areas for demanding missions and activities.
- **Secure storage:** Spacious back pocket with zipper and protective garage.
- **Flexible ventilation system:** Functional two-way side zipper with integrated wind protection for easy wear and airflow control.
- **Adjustable comfort fit:** Robust, individually adjustable suspenders with high-quality Velcro fastening.

ECIG 4.0: Polar-tested, tactically optimized for extreme missions down to -30°C. Uncompromising performance and protection for professionals in arctic, alpine, and urban winter missions.

The polar-proven ECIG 4.0 series sets new standards in tactical equipment for extreme conditions. Designed for operations in the most demanding environments, this multifunctional jacket offers unsurpassed performance in temperatures below -30°C. Its optimized cut ensures maximum freedom of movement with a robust construction – ideal for tactical operations in the most extreme conditions. This jacket is indispensable for emergency services and outdoor professionals who have to rely on their equipment. Whether on arctic expeditions, high mountain missions, or urban winter operations, the ECIG 4.0 offers uncompromising performance and tactical superiority.

- **Tactical discretion:** Covered components for quiet operations, increased durability & reduced visibility.
- **Adaptive inner collar:** Can be zipped in for flexible thermal insulation and weather adaptation.
- **3-way hood system:** Adjustable in three directions and removable for optimum field of vision and hearing protection adjustment.
- **Multifunctional collar:** Wide and adjustable for improved neck protection and compatibility with tactical equipment.
- **Tactical Napoleon pocket:** Quick, discreet access to essential equipment.
- **Advanced closure system:** two-way front zipper with integrated wind flap and chin flap for maximum weather protection.
- **Insulated outer pockets:** Two large-capacity, padded pockets with thermal fleece lining for warm hands and secure gear storage.
- **Strategic sleeve pockets:** Three tactically placed pockets for quick access to small essential gear.
- **Advanced cold protection:** Adjustable snow flap prevents snow and cold from penetrating in extreme weather conditions.

Polar-tested multifunctional trousers for temperatures below -30°C. Optimum protection and comfort for extreme arctic conditions.

The ECIG 4.0 trousers are the ultimate solution for extreme cold conditions, specially developed for temperatures below -30°C. These polar-proven multifunctional trousers combine maximum functionality with sophisticated design to provide optimum protection even in the most demanding arctic environments. The water repellent outer material makes the trousers a reliable companion in all weather conditions, whether snowfall, freezing rain, or extreme gusts of wind. Particular attention has been paid to the practical details: The raised waistband at the back offers additional protection against the cold and drafts. A concealed two-way side zipper that extends to the top of the waist makes it easy to put on and take off the trousers and allows for flexible ventilation.

For maximum versatility, the removable holsters allow a practical drop-seat function – ideal for longer expeditions. The adjustable leg cuffs with Velcro fastening and press studs guarantee a perfect fit together with any type of footwear and prevent snow and cold from penetrating.

- **Raised back waistband:** The higher waistband at the back offers additional protection against the cold and drafts, which is particularly important in extreme weather conditions.
- **Innovative two-way side zipper:** A concealed side zipper extends to waist height and enables easy donning and doffing as well as flexible ventilation options.
- **Practical drop-seat function:** The detachable holsters enable a comfortable drop-seat function, ideal for longer expeditions and improved wearing comfort.
- **Adjustable leg cuffs:** The leg cuffs can be individually adjusted thanks to the Velcro fasteners and press studs. This ensures an optimum fit with different types of footwear – not the slightest hint of snow or cold will be able to penetrate.

CARINTHIA COMBAT SHIRT - CCS

G-LOFT®:
~100g (NI), 100% polyester
Sizes:
S-3XL
Weight (g):
640 (M)
Colors:
olive, multicam, 5-Farb Flecktarn

Advanced Combat Garments – Mission Ready.

Developed for the mission! The functional first layer Combat Shirt is made of a high-quality material mix of NyCo and 4-way stretch. Thus, it offers a comfortable fit and a stable finish. The usual mission-relevant contact points such as elbows and shoulders have been reinforced with robust Cordura. In addition, corresponding elbow pads can be inserted.

A newly developed needled polyester fleece (NI) has been incorporated into the collar and shoulder areas to reduce pressure points and increase comfort. Practical add-ons: front zipper for additional ventilation in temperature-critical situations and quick adjustment of the arm cuff by Velcro. Features such as underarm ventilation through mesh inserts in the armpits are just as useful as Velcro patches on the upper arms. Our Combat Hood is easy and quick to adapt by Velcro points on the collar. Mission ready with Carinthia Combat Garments!

- **Protective stand-up collar:** Enhanced neck protection and wind resistance.
- **Ergonomic sleeves:** Pre-formed for improved range of motion.
- **Elbow protector pocket:** Accommodates optional impact-resistant inserts.
- **Cordura shoulder reinforcement:** Superior durability in high-wear areas.
- **Reinforced elbow area:** Added resilience for extended use.
- **Upper arm sleeve pockets:** Convenient storage for essential items.
- **Underarm mesh ventilation:** Optimized breathability for ideal temperature regulation.

Advanced Tactical Performance

The centerpiece of the Carinthia Combat Garment series is the Combat Jacket. A stable and well-fitting uniform jacket made of a modern material mix for use in the field. Extensively processed stretch material in the outer fabric allows for maximum freedom of movement. Stable stand-up collar with the option to attach our Carinthia Combat Hood. Pre-shaped sleeve construction increases comfort and facilitates quick movement. Cordura reinforced shoulder and elbow area to reduce pressure points and provide high resistance to typical stresses in the field.

Chest pockets with zippers on both sides facilitate access when carrying protective equipment, rigs or a backpack. Napoleon interior pockets made of air-permeable mesh material. For safekeeping of important documents, maps, smartphone, and identification papers, the pocket pouches of the upper arm pockets are made of waterproof material. Generous Velcro areas for troop insignia or the like. Ready for your mission: Carinthia Combat Garments.

- **Adaptive collar:** Sturdy stand-up design, compatible with Carinthia Combat Hood.
- **Ergonomic sleeves:** Pre-shaped for enhanced comfort and mobility.
- **Reinforced high-wear areas:** Cordura-reinforced shoulders and elbows for durability.
- **Tactical pockets:** Dual-access chest pockets, compatible with protective gear.
- **Secure document storage:** Waterproof upper arm pockets for crucial item protection.
- **Ventilated interior:** Breathable mesh Napoleon pockets for temperature regulation.
- **Customizable identification:** Ample Velcro areas for unit insignia and identification.
- **Enhanced elbow protection:** Reinforced area for increased longevity.
- **Rank display:** Designated areas for badges and name patches.
- **Maximum mobility:** Stretch fabric in outer material for unrestricted movement.

Innovative thermal insulation thanks to CARINTHIA ISO Mapping® Technology. Optimum fit and freedom of movement for active outdoor women.

The G-LOFT® TLG Vest Lady uses CARINTHIA ISO Mapping® technology, an improved approach to outdoor clothing. This method combines different G-LOFT® variations to achieve targeted thermal insulation. The vest thus offers effective protection against the cold in areas that are particularly sensitive to heat in women. The result is balanced temperature regulation that combines comfort and functionality.

A key element is the integration of Techno Stretch in the torso area, supplemented by additional thermo-stretch inserts in the torso and back area. Together with the specially adapted cut, these features ensure optimum freedom of movement and a perfect fit for the female body.

Features include a full-length front zipper, a practical Napoleon inner pocket, and two large side pockets, with the left one serving as an integrated pack sack. The hood with reinforced peak can be adjusted using elasticated drawstrings. An internal, one-hand adjustable elastic drawstring at the hem ensures a perfect fit.

This G-LOFT® TLG Vest combines advanced technology with well thought-out, women-specific functionality and offers outdoor enthusiasts a versatile, high-performance garment for various weather conditions and activities.

- **Two spacious side pockets** offer space for essentials and keep your hands warm.
- **Clever 2-in-1 design:** left side pocket functions as an integrated pack sack.
- **Adjustable hood** with reinforced peak and elastic drawstrings for optimum weather protection.
- **One-hand adjustable, elasticated hem drawcord** for a customized fit and wind protection.
- **Innovative Techno Stretch inserts** ensure maximum freedom of movement.
- **Sophisticated material combination** for a perfect balance between thermal insulation and breathability.

Innovative women's jacket with CARINTHIA ISO Mapping® Technology for optimum heat regulation. Functional design with Techno Stretch and mesh inserts for freedom of movement and comfort during outdoor activities.

The TLG series for women sets new standards in outdoor clothing with CARINTHIA ISO Mapping® technology. Different G-LOFT® insulation variants are used to achieve an advantageous warmth/weight ratio – suitable for changeable weather conditions. The jacket adapts to your movements thanks to the integrated Techno Stretch in the torso and underarm areas. Strategically placed mesh inserts in the armpits ensure a pleasant body climate, improving thermoregulation and ventilation. Specially designed for the female silhouette, the women's model has additional thermal stretch inserts in the torso and back area. The carefully tailored women's cut ensures a good fit and emphasizes the female physique. This jacket perfectly combines technical innovation with functional design and offers active women a high level of comfort during outdoor activities.

- **Versatile storage options:** Easily accessible Napoleon pocket for small essentials, 2 spacious side pockets for essential gear.
- **Innovative 2-in-1 solution:** Left side pocket functions as an integrated pack sack.
- **Optimized hood:** Hood with reinforced peak for improved weather protection, precisely adjustable thanks to elastic cords.
- **Comfortable fit:** One-handed elastic drawcord at the hem for individual adjustment. Techno Stretch material for unrestricted freedom of movement.
- **Effective climate management:** Strategically placed mesh inserts for optimum ventilation and temperature regulation.

Feather-weight warmth meets boundless freedom of movement: G-LOFT® Ultra Shirt Lady – your versatile guardian angel for every adventure.

G-LOFT® Ultra Shirt Lady is characterized by its unique combination of lightness and warmth. The optimized stretch inserts ensure maximum freedom of movement during any activity. The innovative G-LOFT® insulation technology offers outstanding thermal insulation with minimal weight, making this shirt an indispensable companion. Whether as a quick layering solution or an insulating layer, it impresses with its compact pack size and excellent thermal efficiency. The body-hugging, anatomically designed cut guarantees an optimum fit, while the quilted collar and pulse warmers with thumb hole provide additional protection against the cold. Functional details such as the ventilation mesh in the armpit area and the discreet access pocket on the back left increase the utility value. The integrated packing system enables compact storage so that the G-LOFT® Ultra Shirt Lady is always at hand when the temperature drops.

- **Quilted collar** with highly efficient G-LOFT® filling for optimum thermal comfort.
- **Unlimited agility:** Innovative stretch inserts in the back allow maximum freedom of movement during any activity.
- **Intelligent climate management:** Strategically placed ventilation mesh in the underarm area for perfect temperature regulation.
- **Feminine silhouette:** Body-hugging cut for a flattering fit and sporty elegance.
- **Sophisticated protection against the cold:** Integrated wrist warmers with practical thumb hole offer additional protection and comfort.
- **Cleverly positioned access pocket** on the back left for secure storage of important small items.
- **Compact mobility:** Cleverly integrated pack sack solution on the inside left for minimum pack size and maximum flexibility on the go.

Protective warmth and comfort support excellent mobility: G-LOFT® Ultra Pants Lady – your protective shield against the cold.

The G-LOFT® Ultra Pants Lady are the perfect solution for use in cooler environments. As a base layer, they combine proprietary G-LOFT® insulation technology with advanced Techno Stretch components to create pants that set new standards in terms of flexibility and thermal efficiency. The trousers are characterized by their exceptional breathability, which ensures optimum moisture transport and heat retention at the same time. This results in a constantly pleasant microclimate, even during intensive physical activity. Targeted protection of the main muscle groups and the use of elastic stretch thermo-fleece elements guarantee maximum freedom of movement with an optimum fit. The integrated compressibility in a special storage compartment underlines the functionality of this high-tech product in low temperature conditions.

- **Comfortable fit:** Highly elastic waistband for a secure and comfortable fit – all day long.
- **Complete freedom of movement:** Innovative stretch thermal fleece inserts over the entire leg area for unrestricted mobility and cozy warmth.
- **Intelligent heat regulation:** Breathable materials ensure a balanced body climate for any intensity of activity.
- **Optimal muscle support:** Strategically placed inserts provide support and comfort for the most important muscle groups.
- **Compact travel companion:** Cleverly integrated pack sack solution on the inside right for minimum pack size and maximum flexibility on the go.

Lightweight, versatile women's gilet with excellent G-LOFT® insulation. Optimum thermal performance, high breathability, and compact stowability.

The G-LOFT® Ultra Vest Lady is the perfect choice for demanding outdoor enthusiasts who value lightness and warmth. This versatile women's vest impresses with its anatomically adapted fit and functional design – practically to be worn as an additional layer or on its own. The excellent G-LOFT® insulation ensures optimum thermal performance with minimal weight and pack size, while the high breathability ensures a pleasant body climate.

The quilted collar with G-LOFT® filling provides effective protection against the cold, while the stretch inserts in the back ensure unrestricted movement. The close-fitting cut allows the garment to perfectly adapt to your body shape.

Particularly practical: the G-LOFT® Ultra Vest Lady can be packed away compactly in its own pocket, making it ideal as a backup vest in a rucksack. This makes it the perfect companion for all outdoor activities where flexibility and performance are essential. Whether hiking, climbing, or for everyday use – this vest offers reliable comfort and protection in a wide range of situations.

- **Warming, quilted collar** with G-LOFT® filling for reliable neck protection.
- **Flexible stretch inserts** in the back guarantee unrestricted freedom of movement during any activity.
- **Ergonomic, close-fitting cut** for optimum thermal insulation and comfort.
- **2 spacious pockets** on the outside provide quick access to important items.
- **Secure Napoleon pocket** on the inside left for stowing valuables.
- **Clever 2-in-1 design:** Left outer pocket serves as an integrated pack sack for space-saving transportation.
- **Minimal pack size** makes the vest the ideal companion for outdoor activities.

G-LOFT® Ultra Jacket Lady: Warmth and freedom of movement in a women's specific design. Versatile functions and compact stowability for active women in everyday life and outdoors.

The G-LOFT® Ultra Jacket Lady combines thermal comfort with freedom of movement thanks to its anatomically adapted cut for women. The proven G-LOFT® insulation provides reliable warmth, while strategically placed stretch inserts allow for good mobility. Integrated wrist warmers and a quilted collar with G-LOFT® filling increase comfort. Sophisticated features such as a ventilation mesh and practical cable routing make this jacket a versatile choice for active women. A special feature is the ability to quickly stow the jacket in its own pocket, making it a handy companion for on the go. The G-LOFT® Ultra Jacket Lady offers a balanced combination of warmth, comfort, and functionality – a reliable option for chilly days and various outdoor activities. With its combination of technical features and smart design, it is suitable for women who value a high-performance and adaptable jacket that is ideal for both everyday wear and sporting activities.

Ultralight comfort for tropical adventures.

- The Tropen sleeping bag is engineered for those venturing into tropical climates where heat, humidity, and insects pose unique challenges. Its focus on breathability and insect protection, combined with its ultra-light design, makes it an excellent choice for jungle expeditions and travel through hot, humid regions where traditional sleeping bags would be uncomfortable.
- **Extreme portability:** Very lightweight construction for easy carrying. Extremely small pack size, perfect for backpacking and travel.
 - **Climate-optimized design:** Exceptional vapor permeability, crucial for comfort in hot, humid tropical nights. Integrated mosquito net for protection against insects.
 - **Efficient insulation:** Differential cut ensures optimal loft and eliminates cold spots. Thermoflect technology reflects body heat when needed.
 - **User-friendly features:** Two-way zipper for flexible ventilation and easy entry/exit. Anti-snap band ensures smooth zipper operation.
 - **Minimalist construction:** 1-layer design balances lightweight properties with necessary protection.

Military-grade performance for demanding conditions.

The Defence 4 is a high-performance 3-season sleeping bag that has earned its reputation in the military sector and is now favored by outdoor enthusiasts and professionals alike. Engineered for reliability in diverse and challenging environments, it boasts a robust construction and advanced features. Its versatility makes it an excellent choice for serious outdoor adventurers, professional guides, military personnel, and anyone requiring a durable sleep system for extended use. The Defence 4's military heritage, combined with its adaptability to varied conditions, ensures that users can depend on it for a comfortable and secure rest in demanding situations. Whether facing harsh weather or rugged terrain, this sleeping bag stands out as a trustworthy companion for those who demand the utmost in performance and durability from their gear.

- **Military-grade durability:** Extremely robust and water-repellent outer material, designed to withstand harsh conditions and frequent use.
- **Optimized insulation:** 2-layer construction provides excellent warmth-to-weight ratio. Differential cut ensures optimal loft and eliminates cold spots.
- **Strategic design:** Centrally located zipper for easy access and even heat distribution. Trapezoidal foot part offers extra space and warmth for feet.
- **Enhanced protection:** Zipper cover flap shields against wind and moisture. Integrated zipper heat flap prevents heat loss.
- **User-friendly features:** Two-way zipper allows for flexible ventilation and easy entry/exit. Anti-snap band ensures smooth zipper operation.
- **Versatility:** Combinable with other sleeping bags for increased adaptability. Suitable for a wide range of 3-season conditions.
- **Advanced technology:** Thermoflect technology reflects body heat for improved thermal efficiency.

Ultimate thermal protection for extreme conditions.

The Defence 6 is a cutting-edge winter sleeping bag designed to provide unparalleled warmth and protection in the harshest arctic environments. Its uncompromising thermal performance and thoughtful design features make it an essential piece of equipment for arctic explorers, high-altitude mountaineers, and military personnel operating in severe winter conditions.

- **Superior insulation:** 3-layer sandwich construction with loose-fitting outer shell maximizes thermal efficiency. Mummy shape and differential cut optimize heat retention and eliminate cold spots.
- **Arctic-grade warmth:** Engineered for uncompromising performance in extreme cold conditions. Thermal collar prevents heat loss around the neck and shoulders.
- **Moisture and wind protection:** Generous zipper heat flap on the inside prevents heat loss. External zip cover flap keeps wind and moisture at bay.
- **User-friendly design:** Two-way center zipper with quick release closure for easy access and emergency exit. Anti-snap band ensures smooth zipper operation, even with gloved hands.
- **Comfort enhancements:** Trapezoidal foot section provides extra space and warmth for feet. Thermo-flect technology reflects body heat for improved thermal efficiency.
- **Portability:** Includes pack sack for compressed storage and transport.

GORE-TEX® ARID LITE AIR
Advanced Protection for Tactical Environments

Our bivy bags and tactical shelters are engineered with GORE-TEX® ARID LITE AIR, a state-of-the-art three-layer laminate that sets new standards in field performance. This advanced material offers:

Absolute Impermeability:
Completely waterproof and windproof, ensuring protection in extreme conditions.

Superior Breathability:
Allows water vapor to escape, maintaining optimal internal climate.

Unique Gas Permeability:
Enables fresh air circulation without compromising on weather protection.

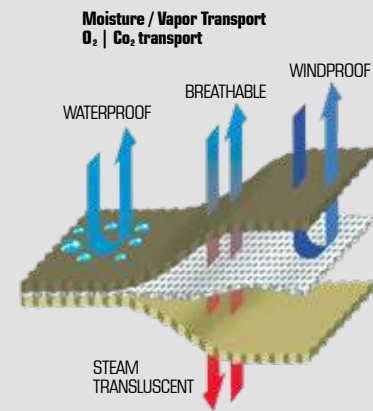

Enhanced Operational Capability:
Allows for full closure of bivy sacks and shelters without ventilation gaps, maintaining concealment and protection.

This cutting-edge technology provides operators with unparalleled protection against the elements while ensuring comfort and maintaining tactical advantage in the most diverse field conditions.

Outstanding versatility and performance.

Whether you’re a military professional on a high-stakes operation or a civilian enthusiast seeking military-grade outdoor equipment, the Observer Plus offers unparalleled protection, concealment, and comfort in the most challenging environments. This advanced shelter deploys rapidly with two self-supporting tent poles, eliminating the need for pegs and ensuring a stable setup in any terrain.

- **Stealth design:** Low-profile construction minimizes detection in the field.
- **Spacious interior:** Accommodates operator and essential gear for extended missions.
- **GORE-TEX® ARID LITE AIR Technology:** Unique three-layer laminate provides complete waterproofing and superior breathability, crucial for long-duration surveillance.
- **Tactical viewing window:** Integrated with a fine-mesh mosquito net, allowing for 360-degree situational awareness while maintaining concealment.

- **Innovative integration:** Featuring a zip-in-zip system, allowing seamless incorporation of your sleeping bag for enhanced thermal efficiency and ease of use.
- **Tactical accessibility:** Entry and exit remain uncompromised, maintaining the same level of comfort and speed as a stand-alone sleeping bag – crucial for rapid response situations.
- **Superior ground protection:** PU-coated bottom guarantees 100% waterproofing against ground moisture, essential for extended field operations in varied terrains.
- **Versatile application:** Ideal for special operations, long-range reconnaissance, and extreme environment survival scenarios.

ACCESSORIES

GRIZZLY

The Grizzly is an ultra-soft and extra-warm micro-fleece sleeping bag, designed for added comfort in moderate temperatures. It can be used on its own as a cozy cabin sleeping bag or combined with any CARINTHIA sleeping bag to enhance warmth in cooler conditions.

Its lightweight and breathable material ensures a comfortable night's sleep without adding bulk, making it a versatile option for indoor and mild-weather use.

Up to a body height of 180 cm.
Center zipper
Size (cm): 225x90
Weight (g): 500
Colors: olive, black

POLYCOTTON LINER

The Polycotton Liner is a lightweight and breathable addition to any sleeping setup. It can be easily attached to a sleeping bag for extra comfort and hygiene or used on its own during warm nights. Its soft polycotton material provides a pleasant sleeping surface, making it a versatile choice for both outdoor adventures and indoor use.

BRACES

Practical braces for a perfect fit without restricting mobility. The CARINTHIA braces can be easily attached to the loops of compatible trousers* and keep them securely in place for optimal comfort and reliability.

*ISG 2.0 Trousers, MIG 4.0 Trousers, ECIG 4.0 Trousers, Windbreaker Trousers & TRG Trousers.

COMPRESSION BAG

Compression bags for CARINTHIA sleeping bags, apparel and bivy bags.

Size S: summer sleeping bags, apparel, and bivy bags
Size M: 3-season sleeping bags, ECIG series
Size L: winter sleeping bags

TRAVEL PILLOWS

With only 130g and a small pack size, this travel pillow ensures a restful sleep.

Insulation: G-LOFT®, 100% polyester
Size (cm): 30x40
Pack size (cm): 8x17
Cover: soft brushed polyester
Colors: black, multicam, multicam black, 5-Farb Flecktarn

WINDSTOPPER BOOTIES

The Windstopper Booties are ultra-light, compact, and easy to pack, making them the perfect choice when your feet need warmth and relaxation. Ideal for those who often experience cold feet in their sleeping bags, they provide additional comfort and insulation. Whether for an overnight stay in a hut or simply to keep warm while resting, these booties ensure cozy feet in many situations.

Insulation: G-LOFT® 250g, 100% polyester
Outer fabric: Gore Windstopper®, 100% polyamide
Inner fabric: 100% polyamide
Sizes: M (36-40), L (40-46)
Weight (g): 300 (M)
Colors: black, olive

STORAGE BAG NET

These breathable storage bags are perfect for properly storing sleeping bags, as they should never be kept compressed in their pack sack for extended periods. By allowing air circulation and giving the material more space, these bags help maintain the loft and longevity of the insulation, ensuring optimal performance when needed.

Size (cm): 38x70

RECYCLING BAG

The CARINTHIA Recycling Bag is a practical and versatile accessory for safely storing and organizing your gear. With a capacity for more than 3 liters, it serves a variety of purposes: from water repellent storage of essential equipment and supplies to keeping your USB power bank or charging cables neatly packed.

As part of a responsible approach to nature, it also provides a convenient way to collect and take any other packaging or waste with you for proper disposal. Designed in a discreet black color with a CARINTHIA logo print, it combines functionality with a sleek, tactical look.

Capacity: 3 liters
Dimensions (cm): 46x26
Outer fabric: 100% polyamide

TACTICAL BASECAPS

Stylish and functional. The breathable mesh fabric ensures optimal ventilation, keeping your head cool in any situation. The practical snapback closure allows for easy, individual size adjustment, ensuring a comfortable and secure fit.

Colors: multicam, multicam black, multicam alpine, woodland, black, olive
