

OPERATING INSTRUCTIONS

YKK Zipper MIG/HIG 4.0 JACKET

CARINTHIA only uses top-of-the-line materials. Regarding our high performance insulation clothing we exclusively install zippers of the market leader YKK.

In undrawn condition some of the zippers have narrow tolerances. Possibly occurring initial handling problems vanish after 10-15 opening and closing procedures.

STEP 1

Push both sliders at the end of the zipper.

Please ensure that both sliders level with each other.

STEP 2

Take insertion pin and push it into sliders up to the stop. A noticable click signalizes the correct position.

STEP 3

Grab the upper slider and close zipper slowly.
